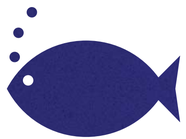
Anyone can talk about respect for the environment. **Cosentino lives it.** In every step of production, from natural stone extraction to transportation to manufacturing to installation, we're committed to respect and protect our environment. We're constantly investing in new technologies that reduce emissions and maximize recycling. We devote significant resources to creating systems that ensure environmental sustainability. We've worked to become leaders in environmental responsibility. That means our products do more than meet industry requirements; they meet the expectations of a conscientious society.

COSENTINO

BAMBOO / COOL

Reduced Emissions: Our manufacturing process includes the use of specialized air handlers that reduce dust.

ENJOY



Water Conservation: Our stone products are manufactured using 98% recycled water.

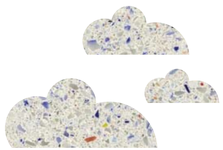
MOUNTAIN MIST

Stewardship: Our quarry restoration plan makes us a leader in the industry in this important area.

SONORA GOLD

Waste Reduction: Unlike granite, in which only 30% of what is mined is used, our quartz products make use of every element extracted.

DALI



In-home Air Quality: GreenGuard certification means our quartz and granite products emit low-to-no chemicals after installation.

STELLAR SUN

Recycled Materials: The Stellar Series is made using 35% post-consumer recycled glass.

RED EROS

Commitment: Cosentino is compliant with current environmental regulations, in addition to the demands of the market and society.
